Claims 1-7 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. Note the format of the claims in the more recent patent(s) cited.

Examples of indefinite language are the repeated use of the phrase "the said (element)". Either the phrase should read -- the (element) -- or should read -- said (element) --. For example the phrase in claim 1, line 4, "the said axial tube" should read -- the tube -- or -- said tube --. In claim 5, line 3, "the bore" lacks proper antecedent basis.

The above should not be considered as an exhaustive list of all language errors in the claims. The claims should be rewritten in proper form.

Claims 1-7 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
